

Defending Your Toenails

Functions of Healthy Toenails:

- Protect toes and surrounding tissue from injury
- Protect nail bed from bacteria and fungi

Damaged, Weak or Brittle Nails:

- Lack proper function
- Are susceptible to bacteria and fungi
- Become painful or uncomfortable
- Look unsightly and embarrassing

Benefits of Nuvail:

- Improves toenail appearance²
- Goes on clear
- Is easy and convenient
- Takes seconds to apply and minutes to dry

Nuvail™ is indicated for managing signs and symptoms of nail dystrophy, i.e., nail splitting and nail fragility, for intact or damaged nails. Nuvail coats and adheres to the nail surface preventing direct abrasion and friction on the nail while also providing protection against the adverse effects of moisture.

Do not apply directly to deep, open, or profusely bleeding wounds.

Please see Full Important Safety Information on back.

Pay \$0 for Commercially Covered Patients

Nuvail™ is indicated for managing signs and symptoms of nail dystrophy, i.e., nail splitting and nail fragility, for intact or damaged nails. Nuvail coats and adheres to the nail surface preventing direct abrasion and friction on the nail while also providing protection against the adverse effects of moisture.

IMPORTANT SAFETY INFORMATION

Do not apply directly to deep, open, or profusely bleeding wounds. Product is flammable in liquid form; avoid using near open flames and sources of ignition. Use in well-ventilated area. **Keep out of reach of children.** Store at room temperature away from heat. Do not allow product to come into contact with floors, counter tops, furniture or other finished surfaces – will stain. May temporarily sting upon application. Persons sensitized to isocyanate should not use this product. Should redness or other signs of irritation appear, discontinue use and consult your healthcare provider.

Your Best Line of Defense for
**Stronger, Healthier
Toenails**

The #1 prescribed brand in
podiatry for nail dystrophy¹

Rx Only
Nuvail™
(poly-ureaurethane, 16%)
NAIL SOLUTION

Applying Nuvail

Steps for Proper Application:

1. Dip applicator and wipe off excess on the lip of the bottle.
2. Apply a very thin layer of Nuvail, covering the entire nail.
3. Allow the nail to dry completely. If nails feel sticky, too much product was applied.
4. Replace cap on bottle when not in use.

- Apply Nuvail once a day before bedtime
- Remove Nuvail once a week with fingernail polish remover
- Continue to apply Nuvail until nails are fully regrown and healthy

Start of treatment

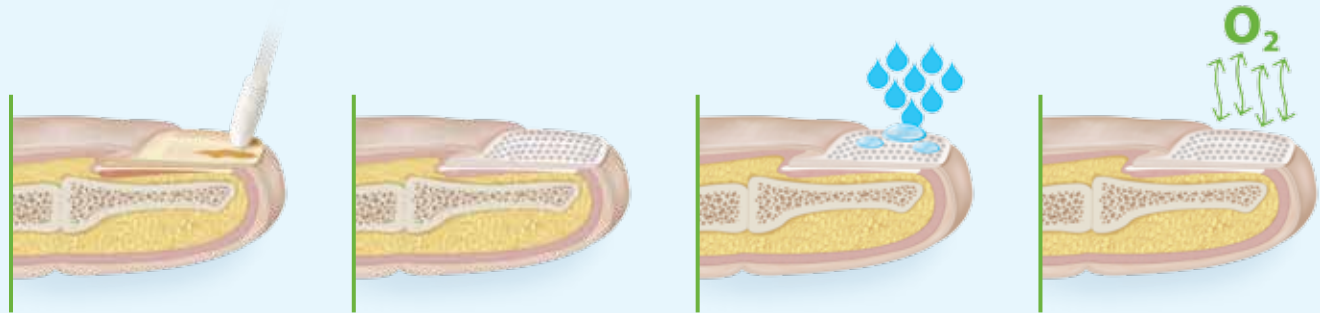

6 months with Nuvail

What to Expect with Nail Regrowth:

- Complete regrowth takes 12+ months
- Nuvail can improve the appearance of toenails as they regrow²

How Nuvail Works

- Penetrates toenail surface ridges and fills spaces³
- Promotes a more even, uniform nail plate⁴
- Reinforces the nail's mechanical support³
- Forms a barrier that is moisture-resistant, yet breathable³
- Helps keep the nail bed dry, creating a less favorable environment for fungal growth and allowing a healthy toenail to grow³

Sand It and Seal It

Before debridement

After debridement

Sealed with Nuvail

If mechanical debridement is part of your treatment, ask your podiatrist how Nuvail can seal and protect your nail as it regrows, while immediately improving nail appearance.
